## Submit a Project Pitch for the In-Person HTAN Data Jamboree

Do you have an idea of how to reuse spatial omics and single cell sequence data to help advance the field of spatial biology? Do you want to work with a small transdisciplinary team, sharing expertise and insights to move your idea forward? **Submit a short project pitch for the 2024 Human Tumor Atlas Network (HTAN) Data Jamboree.** Selected projects will be included in the in-person HTAN Data Jamboree to be held November 6-8, 2024 on the NIH campus in Bethesda Maryland. [Submit your idea by July 12, 2024.](#)

Projects could include building analysis pipelines, visualization techniques, AI/ML algorithm development, employing statistical methods, or using existing computational, mathematical, or informatics tools to address cancer-focused questions. Projects involving data interoperability, such as bringing public data to analyze with HTAN data are welcome. Projects to generate tutorial pipelines and educational tools are of interest. We are also interested in data storytelling, infographics, and other creative uses of the HTAN atlas data. [Learn more and submit your ideas here.](#)

We'd love to hear from you! Contact the ODS team at: [nciofficeofdatasharing@mail.nih.gov](mailto:nciofficeofdatasharing@mail.nih.gov)
