March 2026

Announcements

NEW! [Data Sharing Hub](#) Content Updates. The Hub now includes News and Events pages that feature [ODS Webinars](#) (view upcoming webinar schedules with registration links, access recordings and speaker topics from past webinars, and find Data Jamboree and Symposium Seminar Series presentations), [Annual Data Sharing Symposium](#) (agendas and executive summaries from past symposia), and [Data Jamboree Pages](#) (explore project teams and research goals). Also updated is the [Access Data](#) page, which includes a new section highlighting new NCI dbGaP dataset collections (General Research Use, Health/Medical/Biomedical, Disease-Specific Cancer Research, and Pediatric and Adolescent & Young Adult Collections).

NIH released [NOT-OD-26-046](#): Updated Elements of an NIH Data Management and Sharing Plan.

Effective for applications submitted for due dates on or after **May 25, 2026**, applicants and recipients are required to utilize the new, simpler format. NIH is implementing this updated format page as a pilot and will evaluate the need for additional updates over the next year. [Data Management and Sharing Plan Format Page](#).

2026 NCI Data Jamboree

The National Cancer Institute invites you to participate in the [NCI Data Jamboree: Enhancing Data Sharing and Utility to Advance Cancer Research](#) on November 16–18, 2026 at the NIH Neuroscience Center in Rockville, Maryland. This collaborative event will bring together researchers, trainees, citizen scientists, patients, and advocates to work in small teams and solve scientific and technical challenges using publicly available cancer research datasets.

Participants will gain hands-on experience in cohort building and visualization, data integration and analysis, contribute to the development and application of new tools and approaches, evaluate data quality and AI-readiness, and help identify gaps in existing resources. In-person participation is preferred, with virtual options available. [Registration](#) and [project submission](#) deadline: **July 1, 2026**.

Reminder of Requirement for Certification of IRB Approval

NIH released Reminder of Requirement for Certification of IRB Approval, [NOT-OD-26-043](#), to remind the extramural research community that NIH requires [certification](#) that all nonexempt human subjects research has been reviewed and approved by an appropriate Institutional Review Board (IRB).

[Catalog of Tobacco Control and Communication Survey Items](#)

Understanding the changing landscape of both tobacco products and the related communication environment is critical to prevent tobacco use and develop effective cessation programs. Key resources to help with this understanding are large-scale, national, publicly available surveys that measure both tobacco use and tobacco communication-related factors. These datasets allow for timely analysis of emerging tobacco-related communication questions by taking advantage of existing data.

NIH Launches New Central Resource to Support Replication and Reproducibility

The [Strengthening Replication and Reproducibility of NIH-funded Research](#) webpage serves as a centralized hub highlighting NIH's ongoing efforts to promote rigorous, transparent, and reliable science. Replication and reproducibility are core to scientific progress, helping ensure that research findings can be independently confirmed and built upon. This new NIH-wide resource supports the director's priority to embed high-integrity science throughout the research lifecycle. Moreover, it aligns with the NIH's new [Gold Standard Science](#) framework that emphasizes reproducibility, transparency, rigorous peer review, and the communication of uncertainty as core principles.

Events

Developing the NIH-Wide Strategic Plan for Fiscal Years 2027-2031

The research community, stakeholders, and the public are invited to attend one of two webinars to gather input on the Strategic Plan framework that will inform development of the plan. NIH leadership will introduce the process for developing the next NIH-Wide Strategic Plan, outline the high-level framework, and answer attendees' questions.

Registration is required to attend. If you already registered, the MS Teams link you previously received will no longer be active. **You will need to register again using one of the following new links.**

Dates:

March 16, 2026 12:30 - 1:30 PM | [Registration Link](#)

April 8, 2026 2:30 - 3:30 PM | [Registration Link](#)

Office of Data Sharing Webinar Series: The National Cancer Institute (NCI)'s Office of Data Sharing (ODS) will continue a monthly webinar series for jamboree project teams to share their findings, lessons learned, and future directions in March and April.

[Registration.](#)

NCI ODS Data Jamboree Seminar Series – March

Date and Time: March 17, 2026, 11:00 AM - 1:00 PM ET

Moderator: Mousumi Ghosh, NCI ODS

Speakers: Nicholas Ilosa, Johns Hopkins University. Yin Lu, ICF. Rawan Shraim, Children's Hospital of Philadelphia. Jaime Estill, University of Michigan.

NCI ODS Data Jamboree Seminar Series – April

Date and Time: April 14, 2026, 11:00 AM - 1:00 PM ET

Moderator: Emily Boja, NCI ODS

Speakers: Daniela Orchanski, Scirelab at Foundation for the Progress of Medicine, National University of Cordoba, and CONICET. Yanling Sun, Baylor College of Medicine. Trinh Nguyen, National Cancer Institute. Brian Calpado, National Cancer Institute. Weiping Ma, Icahn School of Medicine at Mount Sinai.

From Data to Discovery: Free NCI Resources to Design and Conduct Data-Driven Projects and Publish New Research in CAYA Cancer

[Registration.](#)

This webinar offers an introduction to resources to help researchers design and conduct data-driven analyses to advance understanding of cancer in children, adolescents, and young adults. Researchers and students can use these resources to describe the incidence, prevalence, and survival of different cancers in these populations and use even more detailed data from real world healthcare providers to investigate late effects of cancer

...detailed data from real-world healthcare providers to investigate late effects of cancer treatments.

Date and Time: Thursday, March 26, 2026, 2:00 PM - 3:00 PM ET

Speakers: Johanna Goderre, National Childhood Cancer Registry (NCCR) Technical Lead.
Martin Krapcho, Project Manager for NCCR*Explorer and CONCORD*Explorer.

Panelist: Patricia Murphy, NCI Surveillance Research Program (SRP) Program Analyst

Moderator: Anne-Michelle Noone, NCI Surveillance Research Program (SRP) Mathematical Statistician

CCDI Virtual Symposium Series

The Childhood Cancer Data Initiative (CCDI) is pleased to convene the CCDI Virtual Symposium Series, following the cancellation of the 2025 CCDI Symposium originally scheduled for last fall. The series will feature a diverse group of experts in childhood cancer research, data science, clinical care, and patient advocacy, who will share emerging insights and real-world applications to advance research and improve outcomes for children with cancer.

Sessions occur across multiple days in March and April.
