2026 Community Days: Securing NIH Controlled-Access Data

The NIH published, “*Required Security and Operational Standards for NIH Controlled-Access Data Repositories*” ([NOT-OD-25-159](#)), standardizing data access and security standards for NIH Controlled-Access Data Repositories ([CADRs](#)) and for users of these data. To help you prepare, the NIH Office of the Chief Information Officer and Office of Science Policy invite you to attend one of two live webinar sessions.

Monday, April 13, 2026 | 1:00 – 2:00 p.m. EDT. [Registration Link](#).

Tuesday, April 14, 2026 | 3:00 – 4:00 p.m. EDT. [Registration Link](#).

Submit questions in advance to gds@mail.nih.gov by **Friday, April 10, 2026**.

2026 NCI Data Jamboree Office Hour

The National Cancer Institute invites you to participate in the [NCI Data Jamboree: Enhancing Data Sharing and Utility to Advance Cancer Research](#), November 16–18, 2026, at the NIH Neuroscience Center in Rockville, Maryland. This collaborative event will bring together researchers, trainees, citizen scientists, patients, and advocates to work in small teams and solve scientific and technical challenges using publicly available cancer research datasets. Participants will gain hands-on experience in cohort building, data access, integration and analysis, contribute to the development and application of tools and approaches, evaluate data quality and AI-readiness, and help identify gaps in existing resources.

To address any questions you may have, the NCI Data Jamboree Planning Committee is hosting an Office Hour for interested participants on **April 10 at 11AM - 12PM ET**. To attend, use the [Webex link](#).

NCI ODS Data Jamboree Seminar Series – April

[Registration](#).

Date and Time: April 14, 2026, 11:00 AM - 1:00 PM ET

Moderator: Mousumi Ghosh, NCI ODS

Speakers: Daniela Orchanski, Scirelab at Foundation for the Progress of Medicine, National University of Cordoba, and CONICET. Sara Savage, Baylor College of Medicine. Trinh Nguyen, National Cancer Institute. Brian Calpado, National Cancer Institute. Weiping Ma, Icahn School of Medicine at Mount Sinai.

CCDI Webinar: Molecular Targeted Therapies Reveal Glioma Cell Plasticity Linked to Immune Evasion in BRAF-Mutant Brain Tumors

[Register](#).

Tuesday, April 14, 2026, from 1:00–2:00 p.m. ET

Join the Childhood Cancer Data Initiative (CCDI) talk featuring Dr. Claudia Petritsch from Stanford University School of Medicine. Dr. Petritsch will lead a discussion on cancer

Stanford University School of Medicine. Dr. F. J. C. will lead a discussion on cancer models in oncology: why we need new models, what can be achieved with these models, and how National Institutes of Health initiatives are helping address critical gaps in cancer model development. She will also present her recent study on therapy resistance in BRAF-mutant brain tumors.

Find ODS at [AACR, April 17 – April 22, 2026, San Diego, CA.](#)

1. Poster: Genomic Relational Privacy in AI Era: a scoping review. Presenter: Ying Huang, MD. April 20, 2026, 9 AM to 12 PM PDT.
2. ODS at [NCI Exhibit Booth #736](#) during exhibit hours to get your questions answered about programs, resources, training, and funding opportunities as well as meet the expert sessions.
3. ODS at NCI-NIH Selected Sessions, Leadership and Staff Presentations: [From Data Commons to Knowledge Engine: AI Enablement Across CRDC and CCDI](#). Monday, April 20, 10:15 to 11:15 AM PDT. Presenters: Erika Kim (CBIIT, NCI), Tanja Davidsen (CBIIT, NCI), Subhashini Jagu (ODS, NCI).

[AI Embeddings for Cancer Research](#)

The Embedding Databases Workshop convenes experts from research, clinical care, technology, and industry to identify a small set of high-impact challenges. The aim is to focus effort on key roadblocks and explore how these emerging tools can responsibly unlock data, ensuring that critical information reaches those who can use it to save lives.

Goal: bring together cross-sector experts to identify key challenges and opportunities in applying embedding-based methods to cancer data, enabling responsible data sharing and advancing clinical impact.

Town Hall: April 9, 2026, 2:00 – 3:00 PM ET. [Registration](#).

If you aren't able to make it to the Town Hall, but still want to share your input, please fill out [this form](#) by April 15th.

Convergence Session: April 23, 2026, 10 AM – 5 PM ET; [Applications due April 13, 2026](#).

Vertical Interoperability Innovation Lab

Participants in the [Vertical Interoperability Innovation Lab](#) will have the opportunity to shape and co-develop the next generation of models of interoperability that enable seamless flow of data across the research lifecycle. By contributing to this effort, you'll strengthen technical expertise, expand your network and position yourself to take advantage of emerging opportunities.

Goal: assemble teams and propose infrastructure architectures (e.g., workflows, models) to bridge first- and last-mile data and metadata gaps, enabling a federated health research infrastructure across the data lifecycle.

Virtual event: June 22-24, July 1, and July 7, 2026

[Apply by April 30, 2026.](#)

Announcements

[NIH Grants Policy Statement – March 2026](#)

The NIH Grants Policy Statement (NIHGPS) makes available, in a single document, the policy requirements that serve as the terms and conditions of NIH grant awards. The [revision](#) supersedes, in its entirety, the NIH Grants Policy Statement (April 2024) as a standard term and condition of the award.

Policy Engagement Efforts to Support Clinical Research

- Ensuring participant safety, rigorous research, and public trust are NIH's highest priorities. With this in mind, NIH is excited to announce two resources and comments will be accepted on these two resources until **May 25, 2026**. More information, including how to comment can be found [here](#).
- [Sharing of Summary Level Study Results with Participants](#) in NIH-Supported Clinical Research (event co-hosted with the MRCT Center of Brigham and Women's Hospital and Harvard)
- Modernizing NIH's [Data and Safety Monitoring Policy](#)

Harmonizing the NIH Definition of “Intervention” with the Common Rule. [NOT-OD-26-063](#).

To ensure consistency and harmonize implementation of the Common Rule across federal agencies, effective with the publication of this Notice, NIH is adopting the definition of an intervention as “both physical procedures by which information or biospecimens are gathered (e.g., venipuncture) and manipulations of the subject or the subject's environment that are performed for research purposes.”

National AI Legislative Framework

The White House has issued a [comprehensive national legislative framework](#) that addresses the most pressing policy topics that AI presents. [Read more](#).
