Announcement

The *All of Us* Research Program Enters the Multiomics Era with Landmark Data Release

The National Institutes of Health's All of Us Research Program made history, unveiling the world's largest integrated dataset that combines unparalleled genomic depth with real-world clinical and wearable data. More than 747,000 participants across all 50 states and territories have shared data, enabling the linkage of nearly 482,000 electronic health records connected to 535,000 whole genome sequences. This release moves All of Us beyond sequencing and into the multiomics era, providing researchers with unmatched statistical power. [Read more.](#)

Events

2026 NCI Data Jamboree

The National Cancer Institute invites you to participate in the [NCI Data Jamboree: Enhancing Data Sharing and Utility to Advance Cancer Research](#) on November 16–18, 2026 at the NIH Neuroscience Center in Rockville, Maryland. This collaborative event in partnership with various NCI programs, and NIH's [All of Us Research Program](#), the [Office of Research on Women's Health](#), and [The Generalist Repository Ecosystem Initiative \(GREI\)](#) will bring together researchers, trainees, citizen scientists, patients, and advocates to work in small teams and solve scientific and technical challenges using publicly available cancer research datasets. Participants will gain hands-on experience in cohort building and visualization, data integration and analysis, contribute to the development and application of new tools and approaches, evaluate data quality and AI-readiness, and help identify gaps in existing resources. In-person participation is preferred, with virtual options available. *Now is the time to kick off a project you always wanted to start or give your ongoing project a sprint. Design your cancer-related question that can be answered with public datasets.*

Both [registration](#) and [project submission](#) as a Project Lead or a Project Seeker are required. Registrations missing project submission information is not valid.

New Deadline: July 27, 2026.

Please reach out to Emily Boja (emily.boja@nih.gov) and Sean Hanlon (sean.hanlon@nih.gov) if you have additional questions.

NCI Office of Data Sharing Seminar Series

[Registration.](#)

Topic: *Generalizable Multi-modal AI Approaches to Advance Cancer Care Delivery*

Date and Time: July 29, 2026, 12:00 PM – 1:00 PM EDT

Speaker: Julian Hong, MD, MS. Associate Professor, Radiation Oncology. University of California, San Francisco

Description: High level randomized controlled data continues to be lacking in artificial intelligence and machine learning applications in healthcare. This session will review one of the early randomized controlled experiences in healthcare machine learning, focused on the prediction and prevention of unplanned acute care during cancer therapy. The discussion will center on subsequent ongoing NCI-funded efforts in multi-institutional generalizability, integration of wearable device data, and prospective validation studies.

NCI ODS Fourth Annual Data Sharing Symposium

Join NCI and cancer research colleagues as we gather for the [Fourth Annual Data Sharing Symposium](#), a free hybrid event!

On November 5th and 6th, the NCI Office of Data Sharing (ODS) is hosting the Annual Data Sharing Symposium *Data to Discovery: Leveraging Cancer Data in the “Real World.”* This event will focus on the advancement of cancer research by leveraging real world cancer data through sharing and reuse. [Register here.](#)

Attendees are invited to present a poster describing how data sharing has impacted your cancer research, or to set up a table to demo an innovative data sharing product. For submission and additional details see the [abstract submission](#), **deadline Tuesday, September 1, 2026.**

- **Submit early! A limited number of poster travel awards may be available.**
Eligibility deadline: Aug 3, 2026
- Posters that showcase novel, impactful, or other meaningful efforts to increasing FAIR sharing of cancer research data are welcome
- Groups who would like to showcase innovative cancer-relevant data sharing capabilities or strategies are welcome to apply for a table setup

Our goal in ODS is to bring together experts and stakeholders throughout the cancer research community (policymakers, scientists, clinicians, and students across government, academia, industry, and advocacy) to learn from one another and explore ways to improve the implementation of new data sharing policies for the greatest public benefit.

[Email the Office of Data Sharing](#) if you would like more information or have general questions.

We'd love to hear from you! Contact the ODS team at: nciofficeofdatasharing@mail.nih.gov
