Resources for Researchers (R4R) Has Moved to the Index of NCI Studies (INS)

The National Cancer Institute's (NCI) Resources for Researchers (R4R) has been integrated into the [Index of NCI Studies](#) (INS), providing a centralized location for discovering NCI-supported research tools, resources, datasets, publications, and other research outputs. As part of this effort, nearly 300 tools and resources previously available through R4R, along with resources from the NCI Data Catalog, have been consolidated into the INS.

The INS serves as NCI's centralized catalog for discovering NCI-supported cancer research outputs. Researchers can now search and browse these resources alongside NCI-supported studies, datasets, publications, and other research outputs through a single platform. The addition of the new Tools and Resources section expands the platform's functionality and improves the discoverability of resources available to the cancer research community.

The NCI Office of Data Sharing will continue to maintain, update, and expand these resources within the INS. As the platform evolves, additional tools and resources will be added to support researchers across the cancer research ecosystem.

Researchers and program staff interested in adding a new resource or updating an existing resource are encouraged to contact the NCI Office of Data Sharing at nciofficeofdatasharing@mail.nih.gov.

The Childhood Cancer Data Initiative Pediatric, Adolescent, and Young Adult Rare Cancer Study ([CCDI Rare Cancer Study](#)) Starts Recruitment

The CCDI Pediatric, Adolescent, and Young Adult Rare Cancer Study is a longitudinal, observational study open to kids, teens, and young adults (up to 39 years old, diagnosed within the last year) with very rare solid tumors. Participants contribute valuable data through surveys and samples, without changing existing treatment plans.

Executive Order – Promoting Advanced Artificial Intelligence Innovation and Security

It is the policy of the United States to promote AI innovation and security by working collaboratively with the private sector to modernize government and private sector information systems and harden them against external threats; to protect American ingenuity and intellectual property from exploitation and theft by adversaries; and to cultivate America's advanced AI-enabled capabilities. [Read more.](#)

Proposed Rule: [Regulation for Federal Financial Assistance](#)

The Office of Management and Budget (OMB) proposes to revise the Guidance for Federal Financial Assistance to improve government-wide policies and requirements related to the management of grants, cooperative agreements, and other forms of assistance. Proposed changes include providing further clarification on the regulatory status of the OMB requirements and on the process for future updates to the government-wide requirements. **Comments are due on or before July 13, 2026.**

Events

2026 NCI Data Jamboree

The National Cancer Institute invites you to participate in the [NCI Data Jamboree: Enhancing Data Sharing and Utility to Advance Cancer Research](#) on November 16–18, 2026 at the NIH Neuroscience Center in Rockville, Maryland. This collaborative event will bring together researchers, trainees, citizen scientists, patients, and advocates to work in small teams and solve scientific and technical challenges using publicly available cancer research datasets.

Participants will gain hands-on experience in cohort building and visualization, data integration and analysis, contribute to the development and application of new tools and approaches, evaluate data quality and AI-readiness, and help identify gaps in existing resources. In-person participation is preferred, with virtual options available. **Both [registration](#) and [project submission](#) as a Project Lead or a Project Seeker are required. Deadline: July 27, 2026.**

Please reach out to Emily Boja (emily.boja@nih.gov) and Sean Hanlon (sean.hanlon@nih.gov) if you have questions.

NCI ODS Fourth Annual Data Sharing Symposium

Join NCI and cancer research colleagues as we gather for the [Fourth Annual Data Sharing Symposium](#), a free hybrid event!

On November 5th and 6th, the NCI Office of Data Sharing (ODS) is hosting the Annual Data Sharing Symposium *Data to Discovery: Leveraging Cancer Data in the “Real World.”* This event will focus on the advancement of cancer research by leveraging real world cancer data through sharing and reuse. [Register here](#).

Attendees are invited to present a poster describing how data sharing has impacted your cancer research, or to set up a table to demo an innovative data sharing product. For submission and additional details see the [abstract submission](#), **deadline Tuesday, September 1, 2026.**

- **Submit early! A limited number of poster travel awards may be available.**
Eligibility deadline: Aug 3, 2026
- Posters that showcase novel, impactful, or other meaningful efforts to increasing FAIR sharing of cancer research data are welcome
- Groups who would like to showcase innovative cancer-relevant data sharing capabilities or strategies are welcome to apply for a table setup

Our goal in ODS is to bring together experts and stakeholders throughout the cancer research community (policymakers, scientists, clinicians, and students across government, academia, industry, and advocacy) to learn from one another and explore ways to improve the implementation of new data sharing policies for the greatest public benefit.

[Email the Office of Data Sharing](#) if you would like more information or have general questions.

We'd love to hear from you! Contact the ODS team at: nciofficeofdatasharing@mail.nih.gov
