Announcements

NCI ODS Data Jamboree Publication

Published in JCO Clinical Cancer Informatics on August 14, 2026, the manuscript titled "[Sustainable Community-Wide Model to Enhance Cancer Data Usage and Utility](#)" showcases the scientific impact of the 2025 NCI Office of Data Sharing's inaugural [Childhood Cancer Data Jamboree](#). Co-authored by 62 experts and jamboree participants across leading research institutions, the publication describes how 120+ participants formed 23 multidisciplinary teams to tackle critical barriers in childhood cancer data discovery, access and reuse. This event demonstrates the power of collaboration and community-driven team science, with initial metrics showing positive impact on sharing FAIR data and making all custom analytical code publicly available on GitHub. Building on this model, the [2026 NCI Data Jamboree](#) is well underway and will take place on November 16–18, 2026 in Rockville, Maryland with opportunities to win cash prizes from the NCI Office of Data Sharing Impact Prize (Track 3).

Request for Information: Draft NIH Policy on Sharing Summary Level Study Results with Clinical Research Participants. [NOT-OD-26-113](#).

The National Institutes of Health (NIH) is seeking public input on a new policy proposal requiring summary level study results from NIH supported clinical research to be shared with participants of those studies. NIH is also seeking input on areas for which supplemental guidance would enable successful implementation with minimal administrative burden. Through this policy, NIH intends to strengthen respectful, transparent partnerships with clinical research participants and enable them to benefit through translation of discoveries into improved health. [Comments](#) will be accepted until **October 26, 2026**.

FDA Seeks Public Feedback to Inform Regulatory Approach for Generative AI-Enabled Medical Devices

The U.S. Food and Drug Administration today issued a discussion paper on considerations for the regulation of generative artificial intelligence (GenAI)-enabled medical devices, seeking feedback from interested parties on risk assessment, premarket evaluation, postmarket monitoring, and other topics relevant to the regulation of GenAI-enabled medical devices. The FDA encourages feedback on the discussion paper from device manufacturers, clinicians, consumers, researchers, the public, and other interested parties, to be submitted under the docket [FDA-2026-N-7874](#) on Regulations.gov by **October 19, 2026**.

[NCI Office of Data Sharing Impact Prize](#)

The [NCI Office of Data Sharing \(ODS\)](#), within the National Cancer Institute (NCI) at the National Institutes of Health (NIH), is pleased to announce the **NCI Office of Data Sharing Impact Prize**. This Challenge seeks to collect ideas and strategies that advance the broad, rapid, and equitable sharing of NCI-funded cancer research outputs. Total cash prizes: \$200,000. **Submissions open through October 5, 2026**. For more information, watch the [Pre-Submission Informational Webinar](#).

[Childhood, Adolescent and Young Adult Cancer Data Innovation Challenge](#)

Harnessing Data and Technology. Accelerating Discovery. Improving Outcomes.

The Childhood, Adolescent and Young Adult (AYA) Cancer Data Innovation Challenge seeks innovative solutions and approaches that will enrich resources (data, methods, or tools) within the CCDI Data Ecosystem, build a federated learning health system (Track 1), and enable exploration, visualization, interoperability, integration and analyses to benefit the outcome of childhood and AYA cancer patients (Track 2). Total cash prizes: \$17,000,000 for up to 30 winning entities across two tracks. **Milestone 1 open until November 13, 2026 11:59 PM ET.** For more information, watch the [Pre-Submission Informational Webinar](#).

It's About Time: Temporal Reasoning in Biomedical Knowledge Graphs Challenge

This two-phase Challenge, led by the Office of Data Science Strategy (ODSS), invites innovators to develop methods, tools, and frameworks that help knowledge graphs represent how biomedical knowledge changes over time, including events, timelines, validity periods, and evolving evidence. The Challenge will award up to \$1 million in total prizes. **Submissions open October 5, 2026.** [Learn more and register.](#)

NCI ODS Fourth Annual Data Sharing Symposium

Join NCI and cancer research colleagues as we gather for the [Fourth Annual Data Sharing Symposium](#), a free hybrid event!

On November 5th and 6th, the NCI Office of Data Sharing (ODS) is hosting the Annual Data Sharing Symposium *Data to Discovery: Leveraging Cancer Data in the “Real World.”* This event will focus on the advancement of cancer research by leveraging real world cancer data through sharing and reuse. [Register here.](#)

[Email the Office of Data Sharing](#) if you would like more information or have general questions.

We'd love to hear from you! Contact the ODS team at: nciofficeofdatasharing@mail.nih.gov
